

MEMBER BENEFIT: ENERGY ALLIANCESM PROGRAM

Looking for?

- Price stability
- Savings versus utility costs
- Optional renewable energy component
- Expert consulting support

The Chamber's Energy AllianceSM Program allows you to choose an energy pricing approach that suits your needs.

Our program is a member benefit, sponsored by the Greater Binghamton Chamber, along with dozens of other Chambers in upstate New York. Participating in the Alliance allows our members to benefit **from the purchasing power of a large group**, reducing electricity and natural gas costs.

Over the years, our members have saved well over \$1 million!

You may select either stable or variable pricing for your electricity and natural gas requirements, or add in renewable credits. Our consultants, EnergyNext, Inc. of Saratoga Springs, manage the program, and will be happy to answer any questions. They can be reached at (518) 580-9244.

Easy to sign up

Find out how the program will benefit your organization by **completing the Participation Authorization form and returning it to the Chamber**. There is no cost or obligation. You will receive a proposal from the Chamber's endorsed energy supplier, and you can decide then what you want to do.

Again, there is no cost to you to participate in the program. You pay only for the energy you use, and the prices are among the most competitive in today's market. So download, complete and return the Participation Authorization form and return it to the Chamber.

For additional questions, contact Carol Armstrong, Development Manager at (607) 772- 8863 x321 or carmstrong@greaterbinghamtonchamber.com.
